Ventura International Pvt. Ltd. was conceived in 1994, under the leadership and guidance of young and energetic entrepreneurs who transferred their spirit into the company's working ethos. They soon identified the gap in creative needs of interior designers and architects and with that of the materials available in the market, and pledged to fill that with the best the world can offer. Ventura is today one of the leading importer in an exclusive range of premium interior decorative architectural and interior related products.

The company has an employee strength of more than 30 in their corporate headquarters in Delhi, assisted by 10 sales personnel stationed across the country. The sales network includes more than 100 distributors having sales points in prime locations in all the major cities of India. The marketing network includes direct, and intensive contact with more than 2000 leading Architects & Interior Designers across India.

Ventura's Mission is to satisfy maximum creative needs of the Interior Designers, Architects and Furniture manufacturers in India. It believes in offering the best possible products sourced across the globe which matches the taste and need of every individual.

Ventura is an exclusive country partner of leading international manufacturers of luxury architectural products such as Metallic Laminates, Veneers, Exterior Facade Panels, Organically Colored Wood Fibre Boards, Embossed Architectural Panels, 3d Wall Panels, Acrylic Glass Panels, Faux Leather Elements & Panels, Innovative Fixing Systems, acoustic panels and many more path breaking products.

These architectural surfaces are suitable for a host of application areas including showroom displays, furnitures, residential & office high-end interiors, multiplexes, outdoor and indoor facades etc.

These premium architectural surfaces are imported from Germany, Italy, Spain, USA, Portugal and Turkey. The products are designed for providing the customers with the latest international blend of design and lifestyle.

Ventura assures it's customers of providing them with the best quality, service, trust and client relationship.

Here, we present to you a preview of our internationally acclaimed product line of architectural surfaces.

Page no.	OUR PRODUCT RANGE
02-03	VETROTEC Acrylic Glass Panels

66-67	VENTO Water Resistant 3D Surfaces
68-69	BUTTON FIX Innovative Fixing Solutions
70-00	OVVO Connection System

Ventura is proud to present VetroTec Acrylic Glass Panels, an internationally acclaimed range of high gloss panels from **Otto, Germany**. These panels are composed of a highly transparent, 2 mm thick extruded acrylic sheet material, which imitate glass panels to 100%. The panels are under laid by more than 10 luxurious decors in metallic and leather surfaces and are supported on a strong counteracting paper. The standard panel size is 3050 x 1020 mm (10' x 3'4"). VetroTec glass panels' UV varnished surface coating provides an enormous brilliance and offers excellent resistance to abrasion and chemicals. The material also shows outstanding optical properties. It is recommended for demanding applications exposed to heavy wear and frequent cleaning like in the kitchen or in the bathroom.

Ventura introduces **3d Wall Panel Systems**, a mesmerizing 3 dimensional panelling with metallic finishes in geometric patterns which is both trendy and futuristic.

3d wall NORM

3d wall NORM is the latest wall panelling design creating waves in international design circles because of its stunning design and innovative technical structure. Made from high tech special polymers these tiles are finished in a wide range of metallic hues in matt and gloss. These tiles can be combined and arranged in a varying angles and directions to show differing shades and create subtle imagery and graphics.

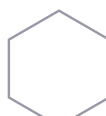

AVAILABLE COLOURS:

Passage Area Wall, Multiplex, London

3d wall SPLINE

3d wall SPLINE has a visual 3 dimensional knitting effect which is inspired by the moving of splay lines. It's elegant, simple, fashionable design. 'Spline' is fully geared to the requirements that architects set for panels. Extremely comprehensive in terms of colors and surface finishes. "Spline" panels are made of different kind of plastics which are preferred in use of high polymer technology. These characteristics make the product strong, durable & light.

3d wall PENTA

3d Wall PENTA is a mesmerizing 3 dimensional geometrical panelling with metallic finishes. PENTA, from the Ancient Greek meaning "combining form of five", consist of a modular tile designed using irregular concave & convex lines at different highs and angles on the plan. The different highs and angles give a sense of depths to the wall by playing with the lights and shadows created by Penta's asymmetric geometry. Available in following colours.

AVAILABLE COLOURS:

TILE DIMENSIONS

PENTA Tiles - Anthracite
Private residence, Oslo

PENTA Tiles - Anthracite
Exhibition Panel, France

PENTA Tiles - Anthracite

Dining area, Restaurant, Tokyo

3d wall MABEL

3d wall MABEL is the latest introduction in 3d wall panel product range. Small polygonal tiles in opposing directions combine to create a subtle geometric stripe. The eye catching design of the tile gives a sense of depth to the wall by playing with the lights and shadows created by Mabel's polygonal geometry.

Ventura's **INTERART** Architectural Panels from **Holz in Form, Germany** and **LATHO, Italy** are one of the most pristine creations you can use in your decor. This dynamic range of impeccably created panels consists of surfaces veneered with numerous wood species in natural textures and impressions. The flowing, dynamic shape of these panels gives the decor a rich elegance found matched only by nature. These designs are available in **Authentic, Modern and Classic structures** in sizes 2440 x 1220mm, 2450 x 1050mm & 3135mm x 1270mm and thicknesses 4.5mm, 18.5mm & 21mm. These architectural panels can be used in various applications like wall paneling, wardrobe shutters, doors, furniture elements in residences, corporate offices, hospitality industry and many more.

Valchromat® is a unique wood fibre panel that is coloured throughout. During its manufacturing, organic dyes are added along with a special melaminic resin which improves the physical-mechanical characteristics to a high standard.

It is an innovative product, used and appreciated by architects, designers, decorators, carpenters from all over the world. All wood used is FSC certified and is sourced from forest waste, residue from timber mills, pine and recycled pine. Valchromat allows several easy solutions for use and assembly and saves time and money from smooth functioning and easy finishing. It does not require the use of paint or gluing an edge because of the colour prevailing through its entire thickness. It is a "one of a kind" product and is manufactured exclusively by Investwood in Portugal, with their proprietary technology.

Viroc is a cement-bonded wood panel for exterior facades made with Portland cement and mineralized wood particles (71% Portland cement, 18.5% wood fibers). It's flat and smooth on both surfaces, combining the strength and flexibility of wood durability and resistant qualities of cement. Viroc can be factory calibrated / sanded (for applications requiring tighter tolerances). Once calibrated, it presents visible wood particles on the surface. It can be machined and worked with typical carpentry tools and comes in 6 different colours. Viroc presents a non homogeneous appearance and product with natural feature. It also can be used for interior woodwork applications, as it has exceptionally strong properties for routing.

The product is non toxic, fire, moisture and insect resistant and has weighted sound reduction index. It can be easily installed and holds CCE, ICC and UL certifications.

RMD Boards

Wall Panels & Wall Coverings

Ventura introduces **RMD Boards**, a mesmerizing range of Wall Panels and Wall Coverings with a variety of textures and finishes. Their unique polypropylene construction and integrated decorative foil surfacing, makes it an ideal, fast, convenient and eye catching panel product.

RMD Boards are set to replace traditional materials in civil constructions and interiors. With exceptional durability, phenomenal protective properties and a wide range of decorative applications, the future of interior spaces is here.

RMD Wall Panels are available in three exclusive ranges - Imperial, Majestic and Classic. These panels are going to be great substitute to the traditional materials such as wood, marble and more while adding a variety of creative designs. Light weight waterproof, scratch-resistant, easy to clean are some of the key feature of these panels.

Available in Sheet Size : 2440 x 1220 mm (8'x4') • **Thickness :** 4.8 mm

RMD Wall Coverings come in rare marble and exotic stone textures with a range of design options and a host of benefits.

Available in Sheet Size : 2440 x 1220 mm (8'x4') • **Thickness :** 5.3 mm

Vento is a textured 3D surface which exemplifies the latest innovation in polypropylene technology. It is designed to resist water and high moisture areas, like bathrooms & Kitchens etc. and finds use in furniture and furnishings. Vento lends elegance to every interior surface with its aesthetic poise and superior quality finish.

PRODUCT DETAILS :

- Colour - White & Black
- Size available : 8' x 4', 10' x 4', 12' x 4' & more
- Thickness : 2.0 mm
- Structure direction on width : 1220 mm

FIELDS OF APPLICATION :

- Shops and Stores • Kitchen shutters
- Restaurants and Hotels
- Trade fair booths • High-quality interior design

ADVANTAGES :

- White colour Vento can also be lacquered in any other colour
- Light weight, low transport costs and high impact resistance
- Scratch resistance and can be used in moisture rich areas
- Ideal for refurbishment of existing furniture or equipment parts
- Is suitable for curved surfaces and can be applied using white glue
- Processing temperature- 18°C-30°C

APPLICATION POSSIBILITIES :

- Door fronts • Wall coverings • Furniture fronts • Desktop surfaces

Button fix is an innovative fitting solution designed for furniture construction and interior fitting. They are simple, durable nylon buttons which are attached at the back of the panel.

Available in 4 variants - **Button fix Type 1**, **Button fix Type 1-Flush**, **Button fix Type 1-Bonded** and **Button fix Type 2**

How to use: These buttons attached at the back of the panel with appropriate screws and the mating fixes are attached to the other. The panels are brought together and are slid until the button fixes click. Type 1 fixes can safely weigh 200 kg, Flush fixes weigh 100 kg, Bonded fixes can weigh 2 kg, while type 2 can weigh 80 kg.

Button fix Type 1 can be configured in many different ways to best suit your application, either surface mounted or rebated into the panel, and oriented for vertical or sideways assembly.

Button fix Type 1-Flush is for applications where panel to panel contact is required and fits a simple oval rebate. It can be rebated into edge of a panel of at least 28mm thick or the face of a panel of at least 18mm thick, and oriented for vertical or sideways.

Button fix Type 1-Bonded is for applications where screw-fixing is not possible. It can be configured in different ways to best suit your application, either surface-mounted or rebated into the panel, and oriented for vertical or sideways assembly.

Button fix Type 2 is ideal for applications where the emphasis is on ease of fit rather than strength, with a simple push/pull fit it, it does not require 15mm drop down engagement as on type 1 fix. Setting out the fixes will depend on whether the panel overfly or are mounted within the background structure.

The Button : Choose the Button to suit the screw type that works best with your panel material.

Use lime green Buttons with Ø5mm countersunk wood screws for the panels of 12mm or above thickness.

Use orange Buttons with Ø6.2mm Euro screws for the panels of 8mm thickness.

Precaution: Avoid any contact with aggressive solvents and cleaning products. Type 2 fixes should only be used on vertical panels or in applications where the weight of the panel does not act to separate the fixing. In critical application always use the safety cord.

OVVO fitting system have a range of connectors that are designed to work in boards of different thickness and material. These innovative fittings eliminates hours of frustration that comes with flat pack assembly. There is no more need for tools, glues or screws. The action is simple. All you have to do is press them together and wait for the 'click' which indicates that the joint has been made.
